Homework Assignment # 1

- Objective:
  - Practice in Normalization

- Requirements:
  - Read the case study to get familiar with the business
  - Study two business documents
  - Arrange all the data from these documents into a 3rd Normal Form schema design

Homework Assignment # 1

- Requirements:
  - Name each attribute; List each attribute
  - Create/Define primary keys
  - Arrange attributes so that each attribute is assigned to the appropriate entity
  - Ensure that each attribute is functionally dependent on the primary key for that entity

Homework Assignment # 1

- Grading:
  - This homework is worth 70 points (70/1000, or 7%) toward your final grade.
  - It is due at 11:59 pm on February 10
  - Late policy applies (grace period through Wednesday, February 13, 11:59 p.m. with 20% late penalty)
  - I will require the graders to complete grading within two weeks of submission deadline

Homework Assignment # 1

- Rubric:
  - All entities and attributes are defined with meaningful, clear names
  - Primary keys are effectively designed
  - Graders will not scrutinize your Unnormalized, First and Second Normal Form columns. They are the means to the end (3NF).
  - Student followed instructions

Homework Assignment # 1

- Submission
  - You should present your finished results in a "Spreadsheet" format as provided in the example below that we looked at in class.
  - Save your spreadsheet as a PDF and submit the PDF via Moodle where the assignment appears in the Week Four materials.

Homework Assignment # 1

- Instructions:
  - Read the case study to become familiar with the business
  - Use the documents depicted on pages 38 and 40 of your case study text
  - List all data elements ("attributes") in the "unnormalized" column
  - Go through the list and put all data into First Normal Form.
  - Replace each document name with an entity name as needed.

Homework Assignment # 1

- Instructions:
  - If an attribute appears on multiple documents (for example, CustomerName), only list it once in your First Normal Form column.
  - Identify entity names by highlighting them in yellow
  - Identify the Primary Keys by highlighting them in a different color other than yellow (as you see in grey in the example below.)

Homework Assignment # 1

- Instructions:
  - If no reasonable candidate key exists, then create a surrogate key
  - Your final 3NF column should contain all the data in all the documents organized by entity, listing all attributes in each entity with primary keys defined.
  - If an entity does not change from first to second normal form, then simply copy and paste the data into the second normal form column to show that the data is already in second normal form.

Homework Assignment # 1

- Example from class:

	A	B	C	D	E	F	G	H
1		**UNNORMALIZED**		**FIRST NORMAL FORM**		**SECOND NORMAL FORM**		**THIRD NORMAL FORM**
